

Climate Change Working Group Action Plan

1-5 Yr Action Plan

1. Work alongside NPH Parish Council to use as a source of information for residents wanting to Reduce, Re-use and Recycle which in turn will help reduce Carbon Footprint within the Parish over the next Five Years.
2. Collaborate with local community groups to help support the improvement and protection of open spaces within the Parish.
3. Trees - Creation of a short rotation coppice using predominantly Willow and Poplar to be planted in Webbers Meadow.
4. Wild Flowers to be planted in designated areas (Entrances to the villages and verges to public areas) of Newton Poppleford, Harpford and Venn Ottery to encourage bees and insects.
5. Six Monthly newsletter/Parish Magazine informing residents of Projects going on with the Climate Change Group and how residents can help.

Climate Change Working Group Action Plan

10 Yr Action Plan

1. Possible Traffic Calming scheme to reduce speed (20mph) through the village and reduce Carbon Emissions via monitoring over a set period to see if reduction can be achieved with better footpath access and cycle lanes introduced by 2030 (to be discussed and reviewed with EDDC if viable).
2. Work through NPH Neighbourhood Plan to implement best practise to improve Climate and protect open spaces for natural habitat. By working alongside the local schools to encourage the younger generations to help build better habitats for local wildlife and insects.
3. Ensure all NPH Parish Buildings have Grey Water Harvesting and alternative heat sources by 2030.
4. Develop Partnerships with Clinton Devon Estates to support where necessary with Trees and surrounding areas.
